

Recruitment Marketplace Platform Workflow

1. Company Registration

1. The company creates an account.
 2. The company creates its company profile.
 3. The company profile displays its general recruiter commission range, such as \$3,000–\$20,000.
-

2. Company Posts a Job

1. The company creates a job post at no cost.
 2. While posting the job, the company enters the specific recruiter commission it is willing to pay for that position.
 3. The company loads or commits the recruiter commission amount for the job.
 4. The job is published on the platform.
 5. The job becomes visible to subscribed recruiters.
-

3. Recruiter Registration and Subscription

1. The recruiter creates an account.
 2. The recruiter creates a recruiter profile.
 3. The recruiter pays the monthly subscription fee.
 4. After successful payment, the recruiter receives access to the job marketplace and job map.
-

4. Recruiter Browses Jobs on the Map

1. The recruiter opens the job map.
 2. The recruiter can view available jobs by state.
 3. The recruiter selects a state.
 4. The map displays all available jobs within that state.
 5. The available jobs are also displayed in a list.
 6. The recruiter can click a specific job to view its complete details.
 7. The job details include the recruiter commission offered for that position.
-

5. Recruiter Submits Candidates

1. The recruiter clicks the candidate submission button on the selected job.

2. A candidate submission form opens.
3. The recruiter can submit up to five candidates at one time.
4. For each candidate, the recruiter can provide:

- * Candidate name
- * Reference information
- * Attachments

5. The recruiter submits the candidate application.
 6. The submitted candidates are sent to the company's inbox.
-

6. Company Reviews Candidate Applications

1. The company opens its inbox.
 2. The company reviews the candidates submitted by the recruiter.
 3. The company reviews candidate names, references, and attachments.
 4. The company decides whether it wants to schedule a meeting with the recruiter and candidate.
-

7. Company Sends Interview Availability

1. The company selects available interview dates and times.
 2. The company sends its availability to the recruiter through the platform.
 3. The recruiter receives the proposed interview availability.
-

8. Recruiter Responds to Availability

The recruiter can:

- * Confirm one of the proposed times, or
- * Send a message requesting another suitable time.

When the recruiter requests another time:

1. The company receives the recruiter's message.
 2. The company sends updated availability.
 3. The company and recruiter continue until both agree on a suitable time.
-

9. Online Meeting

1. Once both parties agree on a date and time, the meeting is confirmed.
 2. The company, recruiter, and candidate join the online meeting.
 3. The company evaluates the candidate during the meeting.
-

10. Company Sends an Offer

1. If the company likes the candidate, the company sends an offer to the recruiter through the platform.
 2. The offer includes the relevant placement and payment details.
-

11. Recruiter Responds to the Offer

The recruiter can:

- * Accept the offer
- * Decline the offer
- * Send a counteroffer

If a counteroffer is sent:

1. The company reviews the counteroffer.
 2. The company can accept it, decline it, or send an updated offer.
 3. The process continues until both parties agree or the offer is declined.
-

12. Offer Accepted and Payment Held

1. Once the offer is accepted, the agreed recruiter commission is held by the platform.
 2. The candidate's confirmed joining date is recorded.
 3. The 30-day payment-hold period begins from the candidate's joining date.
-

13. Candidate Joins the Company

1. The candidate starts working on the confirmed joining date.
2. The platform tracks the 30-day period following the joining date.
3. The recruiter can monitor the payment status during this period.

14. Company Dispute Period

During the 30-day period, the company can raise a dispute and request that the recruiter payment not be released.

When a dispute is raised:

1. The payment remains held by the platform.
2. The dispute is reviewed through the platform.
3. The payment is not released until the dispute is resolved.

15. Successful Recruiter Payment

If the candidate completes the 30-day period and the company has not raised a valid dispute:

1. The payment hold is completed.
2. The platform releases the agreed recruiter commission.
3. The recruiter receives the payment.
4. The transaction is marked as successfully completed.

Complete Flow

Company creates account

- Company creates profile with general commission range
- Company posts a job for free
- Company sets the specific recruiter commission for the job
- Recruiter creates account
- Recruiter pays monthly subscription
- Recruiter accesses the job map
- Recruiter selects a state and views jobs on the map and list
- Recruiter opens a specific job
- Recruiter submits up to five candidates
- Company receives candidates in its inbox
- Company reviews candidate information
- Company sends interview availability
- Recruiter confirms or requests another time
- Both parties agree on a time
- Online meeting takes place

- Company sends an offer
- Recruiter accepts, declines, or counters
- Offer is accepted
- Recruiter commission is held by the platform
- Candidate joins the company
- 30-day hold period begins
- Company may raise a dispute during this period
- If no valid dispute exists, the platform releases the payment to the recruiter

From Client

Company profile shows recruiter commission range

Note: Recruiter commission range should be set at posting of job for that particular job (company sets the recruiter fee when they post the job/not right when they create profile)- However, company can load funds to their account after creating profile (so they don't have to continuously upload funds if they want to raise the payout fee to recruiter if it is not yielding candidates). This will actually be preferred.

Page 3

Company Posts Job for Free

NOTE: When posting job, Company sets Recruiter Fee (which shows on Recruiter Map). Company must have sufficient funds loaded to account equivalent to or more of Recruiter Fee they're positing the job at)

Page 7

Recruiter Opens a Job and Submits Candidates

NOTE: Where it shows Name, Reference, Attachments should be Name, Candidate Overview (which will be text box for Recruiter to type info on candidate background), Attachments (To attach Resume, References, etc.)

Page 9

Company Sends Interview Availability

NOTE: Will need option for Company to select Interview Type: Phone, Video, or In Person

Page 10

Recruiter Confirms Time or Requests Another Time

NOTE: Prefer to Confirm Day/Time within the calendar versus Message so that the interview is logged/tracked in the Platform and is visible to both Recruiter and Company within platform (so

everyone is on the same page). Can still have messaging available for requesting new availability. Only Confirmed Date/Time within the Calendar.

Page 12

Company Sends Offer to Recruiter

NOTE: Also should be option for Passing on a candidate after interview or Schedule Next Interview. Company should be automatically prompted after interview time window to Make Offer, Schedule Next Interview, or Pass versus only option to Make Offer. If Pass, automatically prompts Company to provide feedback on candidate (why they are passing) via small text box before Company can proceed.

No arrow between Page 10 and Page 13

NOTE: Cannot move to Recruiter Response before Company Sends Offer

Just confirming. The Company will edit the fee per each job when they go to post a job. So they'll edit the commission fee up or down within the job posting for each job they have posted. Like it says under M3 Bullet 2. So just curious what this one refers to. Thanks for clarification.

These sections added to page above (Company Side - Upload Job Page). NOTE: These were just cut off in my image above, but these questions would need to be added to the Upload Job Page on the Company Side as well, since they will give Recruiter good info on hiring timeline and other relevant information.

Some Q&A to Client

1. How does a company currently engage a recruiter?

Company posts job to site ->

Job goes into Recruiter side of platform showing up within Map as Job Card with details ->

Freelance recruiter clicks Job Card showing job details entered by company ->

Recruiter submits candidate to job to Company inbox ->

Submitted candidate shows up within Company inbox showing candidate details ->

Company clicks Schedule button with Date/Time options (Calendar) and submits available time for interviews ->

Recruiter coordinates with Candidate and schedules video call with Company (Using Zoom within the platform)

2. Can multiple recruiters work on the same job, or is one recruiter assigned per position?

Recruiters can browse the Job Map and any recruiter can submit candidates (multiple recruiters). The goal of platform is to provide Company with inbox full of highly qualified candidates, so multiple recruiters.

3. How is the recruiter currently paid? (fixed fee, percentage of salary, retainer, etc.)

Recruiter is paid the stated flat fee that the company is offering within the Platform (not a percentage)

4. At what point is a recruiter considered successful and entitled to payment?

Company's stated fee within platform will be held within the platform (within Stripe holding account) once offered. Recruiter entitled to payment after 30-days of start date (guarantee period).

5. Are contracts currently signed between the company and recruiter?

Yes, but will be digital contract within the platform upon posting a job (Company) and at Sign Up stage (Recruiter)

6. Who handles disputes if there is a disagreement about a placement?

Platform/Myself handles all disputes within placement to start via direct reach out using Sign Up information from Recruiter and Company.

24-hours after each scheduled interview dates Platform has automaticity prompted question to Company and Recruiter asking "Did Company Hire Candidate Name" (Recruiter) with Yes or No options and "Did You Hire Candidate Name?" (Company)

Any disputed/mismatching answers is flagged within Platform for my direct outreach for resolution.

1. What are the biggest operational problems you want the platform to solve today?

We have to create the most clean, user friendly, simple to use, exciting website with the absolute best interface that solves these 3 main operational issues in Recruiting:

1. Allowing Companies to name their own price for what they're willing to pay a freelance recruiter for the right candidate versus paying pre-determined agency fees.

2. Allowing freelance Recruiters to have open access to a market of jobs where companies are willing to pay a fee, eliminating business develop part of the job for freelance Recruiters.
3. Companies provide Recruiter all needed information upfront for the Recruiter to fill the job. Oftentimes, companies like to send a Job Description and assume you'll go recruit. This Platform asks the Company all needed information based on industry experience upfront which displays within Job Card seen by Recruiter to effectively be able to find the right candidate for the job. 8. If the platform only automated three parts of your current process, which three would provide the most value. 1. Job Intake Process (typically a call between Recruiter and Company to gather details about Duties, Pay Scale, Hiring Timeline, Etc). This will be automated and this info will be collected when Company submits job to platform. 2. Fee Negotiation: This will already be stated by Company and displayed/viewed on Recruiter Map. 3. Hiring Workflow: Submitting candidates (Recruiter), Viewing candidates in inbox (Company), Scheduling Interviews (Both), Making Offer (Company) or Declining Candidate (Company).
