

# Recruitment Marketplace Platform — Two-Phase Delivery Plan

---

**Total timeline:** 3 months (2 deliveries × 1.5 months)

**Split logic:** Phase 1 delivers everything up to and including job browsing — accounts, profiles, fund loading, job posting, recruiter subscription, and the job map. This is a complete, independent loop: companies register, load funds, and post jobs; recruiters subscribe, browse the map, and view job details with fees. Phase 2 delivers everything from candidate submission onward: submission, company review, interview scheduling, the meeting, offers, payment hold, disputes, and payment release.

---

## Phase 1 — Marketplace Foundation (First 1.5 Months)

### Modules

#### M1. Company Registration & Profile

- Company creates an account
- Company creates its company profile
- Profile displays the general recruiter commission range (e.g., \$3,000–\$20,000)

#### M2. Company Fund Loading

- Company can load funds to its account after creating the profile
- Loaded balance is available so the company doesn't have to re-upload funds each time it wants to raise a recruiter fee

#### M3. Job Posting

- Company posts a job at no cost
- Company sets the specific Recruiter Fee for that job at posting time (fee shows on the Recruiter Map)
- Company must have sufficient loaded funds — equal to or more than the Recruiter Fee — to post the job
- Job is published and becomes visible to subscribed recruiters

#### M4. Recruiter Registration & Subscription

- Recruiter creates an account
- Recruiter creates a recruiter profile
- Recruiter pays the monthly subscription fee
- After successful payment, recruiter gets access to the job marketplace and job map

#### M5. Job Map & Browsing

- Recruiter opens the job map and views available jobs by state
  - Recruiter selects a state → map displays all available jobs in that state
  - Available jobs are also displayed in a list
  - Recruiter clicks a job to view complete details, including the Recruiter Fee offered
- 

## Phase 2 — Hiring Workflow & Payments (Second 1.5 Months)

### Modules

#### M6. Candidate Submission

- Candidate submission button on the selected job opens a submission form
- Up to five candidates per submission
- Per candidate: Name, Candidate Overview (text box for the recruiter to type candidate background info), Attachments (resume, references, etc.)
- Submitted candidates are sent to the company's inbox

#### M7. Company Inbox & Candidate Review

- Company opens its inbox and reviews the submitted candidates
- Company reviews names, candidate overviews, and attachments
- Company decides whether to schedule a meeting with the recruiter and candidate

#### M8. Interview Availability & Scheduling

- Company selects available interview dates and times and selects the Interview Type: Phone, Video, or In-Person

- Company sends availability to the recruiter through the platform
- Recruiter confirms a day/time within the calendar (not via message), so the interview is logged in the platform and visible to both recruiter and company
- Messaging is available only for requesting new availability; only calendar confirmation counts
- Company sends updated availability; loop continues until both agree

#### **M9. Online Meeting**

- Once a date/time is agreed, the meeting is confirmed
- Company, recruiter, and candidate join the online meeting
- Company evaluates the candidate during the meeting

#### **M10. Post-Interview Prompt**

- After the interview time window, the company is automatically prompted to: Make Offer, Schedule Next Interview, or Pass
- If Pass, the company is prompted to provide feedback on the candidate (why they are passing) via a small text box before proceeding
- Schedule Next Interview returns to the scheduling flow (M8)

#### **M11. Offer & Negotiation**

- Company sends an offer to the recruiter through the platform, including placement and payment details
- Recruiter can Accept, Decline, or send a Counteroffer
- On a counteroffer: company reviews and can accept, decline, or send an updated offer; loop continues until agreed or declined
- The recruiter response step cannot occur before the company sends an offer

#### **M12. Payment Hold & Joining**

- On acceptance, the agreed recruiter commission is held by the platform
- Candidate's confirmed joining date is recorded; candidate starts on that date
- 30-day payment-hold period begins from the joining date and is tracked by the platform
- Recruiter can monitor the payment status during this period

#### **M13. Company Dispute Period**

- During the 30 days, the company can raise a dispute requesting the payment not be released
- While disputed, the payment remains held; the dispute is reviewed through the platform
- Payment is not released until the dispute is resolved

#### **M14. Recruiter Payment Release**

- If the candidate completes the 30-day period and no valid dispute exists, the hold completes
- Platform releases the agreed recruiter commission to the recruiter
- Transaction is marked as successfully completed
